

22. March 2022

KARL JÜRGENSEN has been using Krone for 40 years

Vehicle handover: Type 3 long HGV The Karl Jürgensen company recently took delivery of two long HGVs from Krone. The type 3 combinations - three-axle motor vehicle, actively steered Krone dolly and Dry Liner semi-trailer - are 25.25 m long. As special equipment, the box bodies have double deck systems and floors reinforced to 8 t load capacity by additional cross beams. Gerald Augustin, member of the management board of the owner-managed company with locations in Hamburg and Schleswig, has relied on the cooperation with Krone for more than 40 years: "Reliability and quality are the most important factors for our customers. That is precisely why we appreciate Krone's combination of accessibility, humanity and quality. We have a total of more than 80 Krone trailers, platforms and swap bodies in use." Björn Budde, Sales Manager DACH: "We would like to thank Karl Jürgensen very much for their many years of trust in Krone technology. Our long HGVs in particular, which are based on decades of experience in Scandinavia, stand for efficient and ecological road haulage with up to 50 percent more load volume. At the same time, they are equipped for maximum safety: In addition to the prescribed components, the actively steered Krone dolly developed by us in particular ensures good handling, so that the BO circle of forces can be mastered without any problems." Since 1928, the Karl Jürgensen brand with its motto "Logistics at its best" has stood for efficient and flexible forwarding and logistics solutions. Today, the company with its more than 250 employees attends to over 1,700 customer enquiries in almost all product areas every day and ensures smooth logistics processes.
