Krone vehicles for improved city and port logistics

Krone showcases the Profi Liner City and container chassis eL20 at Transport Compleet

The German commercial vehicle manufacturer Krone is exhibiting at the Transport Compleet trade fair. This international trade fair will take place from September 4 to 6 2018 in Gorinchem in the Netherlands. Krone will showcase the Profi Liner City, a flatbed semitrailer for city-friendly transport. It is equipped with forced steering, which makes it exceptionally manoeuvrable when making deliveries in tight areas. The Profi Liner City transports building materials, furniture, and electronics, to name a few. Krone is also presenting the container chassis, the Box Liner eL20 with a compact rear. It transports 20' containers flush with the rear, thereby increasing fifth-wheel pressure. With a net weight of 3,400 kg, it offers a payload of 37,600 kg.
